

# HOW TO SOLAR NOW

## JOIN OUR SPRING SOLAR MAPPING COHORT

We are seeking 10-15 municipalities in the Mid-Hudson Region to participate in a guided workshop series through Scenic Hudson's Solar Mapping tool. The tool has many uses including determining good areas for the development of solar and identifying areas to be avoided and/or protected.

**WEDS. EVENINGS FROM 7 - 8:30PM**  
**5 SESSIONS FROM MARCH 16TH- MAY 11**  
**REGISTER HERE BY MON FEB. 28**

Who are we looking for?

Planning Board members, Environmental Commission members, Climate Smart Communities, community groups in the seven-county Mid-Hudson region and beyond. No municipal resolution is required for participation, but participants who do not serve on a local or county board or commission will need to contact their municipality so they can have access to necessary documents and plan to share their findings with their local officials after completing the training. Continuing Education Credit will be available for Planning Board members. This training will focus on including members of Environmental Justice and Priority Communities.
