**Hudson River Phase II dredging exceedances May 5 - November 30, 2012:**

- Several air quality monitoring exceedances throughout each month of the dredging season at the Processing Facility as well as at each River Location D through H as they became active:
  - Processing Facility – 39 exceedances
  - River Location D – 12 exceedances
  - River Location E – 30 exceedances
  - River Location F – 14 exceedances
  - River Location G – 1 exceedances
  - River Location H – 3 exceedances
  
- Very few PCB water quality exceedances: only August 2, 3, 4 and September 16 at 512, 780, 694, and 594 ppt, respectively at Schuylerville Lock 5 (PCB concentrations in parts per trillion, ppt). Exceedance Level: “far-field PCB concentration has a confirmed exceedance of 500 ppt” (source: <http://www.hudsondredgingdata.com>)
  
- No odor, noise, lighting, nor navigation monitoring exceedances this dredging season
