

HUDSON RIVER SLOOP CLEARWATER

BLOW THE WHISTLE ON GE!

GE Has Been Decommissioning Its PCB Cleanup Behind our Backs!

The [Campaign for a Cleaner Hudson](#) has learned that the U.S. Environmental Protection Agency is allowing General Electric to take apart and remove much of its PCB cleanup operations - *before the agency approves a "decommissioning" plan.*

TELL EPA TO DO ITS JOB OF REGULATING!

EPA Region 2 Administrator Judith Enck conceded that dismantling operations would be "inefficient and a waste of resources" while PCB-contaminated sediments remain in the river and navigation channel.

Now we know **it is already underway!**

Send [an urgent message](#) to [Judith Enck](#) and EPA national administrator [Gina McCarthy](#) calling for urgent attention to this issue.

THE PEOPLE ARE DOING OUR JOB!

- [Nearly 80 municipalities have already passed resolutions](#) in support of a more extensive cleanup.
- [The State Assembly and Senate](#) have written to Gov. Andrew Cuomo and GE CEO Jeffrey Immelt.
- Thousands of citizens have participated in [Candlelight Vigils](#) and social media actions in support of a cleaner river.

KEEP UP THE GOOD WORK & SAVE AND PROTECT OUR RIVER!
