Clearwater's Sail on Washington

All our waters are connected. All our waters must be protected

Petition In Support of Environmental Protection and Clean Water

TO: SCOTT PRUITT, ADMINISTRATOR, ENVIRONMENTAL PROTECTION AGENCY; CC: CONGRESS

We, the undersigned, support the Environmental Protection Agency (EPA) and strong federal environmental regulations that protect public health and safety, and ensure a sustainable future for generations to come. Americans want clean air and water for themselves and their children. Because pollution doesn't stop at state borders, the federal government has an essential role to protect these vital resources and must not abdicate its responsibility to do so. In 1970 Clearwater sailed to Washington DC in support of the Clean Water Act, which was passed in 1972. Now, on its 45th anniversary, we face new challenges – including the pollution of drinking water in Flint, Michigan and in Hoosick Falls and the City of Newburgh, New York, among others. We also urgently need action to address climate change. We strongly support the EPA and its accomplishments – and look to the federal government continuing to protect our waterways, which are essential to the health, well-being and economic revitalization of our communities and watersheds.
